The F/1 class chose to create a stigloo (stick igloo) for their area in EDEN. In the holidays the frame was created, all ready now for the sticks (a big thank you to Mrs Kroschel and Mr Kubisch).

In maths students have been learning about addition and subtraction. Students had to write a story that involved addition or subtraction and then film it on the iPad. Each group got to watch the stories and record how they worked it out using one of the strategies they had learnt, such as counting on, writing an equation or drawing a picture. (See below)

In English students have been looking at creating narratives. They had the opportunity to create a story in a small group (left). Students also used pictures to help create a story (right). They also worked in partners to come up with different ways to begin a story. They found out from the 5/6 class that it isn’t a great idea to start with ‘One day’ and ‘Once upon a time’.

The F/1 class experienced and learnt about an afternoon tea. Students enjoyed a cup of milo and some finger food. The students used the opportunity to catch up with each other and it was a good experience for Richie (our student from China) to practise his communication skills. (See right)
